DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-11 and 21-29 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 7, 9, 10, 21, 22, 24, 28 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Okamoto.

As per claims 1 and 9, Okamoto discloses a system for controlling multiple refrigerators 1 (while Figure 1 shows only one refrigerator, the invention is directed to allowing a manufacturer to communicate with multiple refrigerators), each having its own refrigeration component, common operating unit 5, signal transmission component (combination of 6, 8, and 10) constituting the sole interconnection for transmitting signals between the operating unit 5 and the refrigeration unit for the purpose of controlling the refrigerator.

As per claims 2 and 22, Okamoto discloses each refrigerator having its own control unit 9 connected to the operating unit via the signal transmission component.

Application/Control Number: 10/774,784

Art Unit: 3744

As per claims 4 and 24, the refrigerator of Okamoto has both a refrigeration unit and freezer unit (Figure 2).

As per claim 7, Okamoto discloses the transmission component comprising a cable connection (LAN 8 portion connecting the refrigerator to home gateway 10.

As per claims 10 and 21, Okamoto discloses refrigeration data transmission (note also that the portion of each of the claims following the word "particularly" is not accorded patentable weight since it is unclear whether this is meant as a limiting feature or only an example of the type of data transferred).

As per claims 27 and 28, each of the refrigeration units are free standing and coupled to the central controller (Figure 1)

As per claim 29, the signal transmission component (combination of 6, 8, and 10) constitutes the sole interconnection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5, 6, 25, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okamoto.

As per claim 5 and 25, Okamoto does not specifically show an ice maker. However official notice is taken that these are common and well-known components that would have been

Application/Control Number: 10/774,784

Art Unit: 3744

obvious to one of ordinary skill in the art at the time the invention was made to include with the refrigerator of Okamoto for conveniently providing ice to the user.

As per claims 6 and 26, Okamoto does not specifically show a bus system. However, bus systems are common and well-known devices for making multiple connections, and would have been obvious to one of ordinary skill in the art at the time the invention was made to include with the system of Okamoto in order to connect multiple appliances to the home gateway.

Allowable Subject Matter

Claims 3, 8, 11, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3744

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc E. Norman whose telephone number is 571-272-4812. The examiner can normally be reached on Mon.-Fri., 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
